Ivander Johana Pratama

AI Engineer, Software Engineer, and Product-Minded Builder

Jakarta, Indonesia | ivanderjohanapratama@gmail.com | +62 821 7515 4739 | LinkedIn | GitHub | Portfolio

Information Systems professional who builds AI-powered products and enterprise systems end-to-end. Combines software engineering across Python, REST APIs, React, and LLM integration with product lifecycle ownership and stakeholder collaboration. Focused on aligning technical delivery with user needs, business goals, and reliable operational rollout.

CORE STRENGTHS

Tools & Technologies Python, React, C# / .NET, PostgreSQL, MySQL, Docker, LangChain, Gemini AI, Claude AI, Ollama	**Product & Delivery** Product Lifecycle Management, Requirement Gathering, Stakeholder Communication, B2B Negotiation, Cross-Functional Leadership, UI/UX Strategy, Agile / Scrum
Technical Foundations AI / ML Integration, LLMs, RAG, NLP, System Architecture, RESTful APIs, AWS, GCP	

PROFESSIONAL EXPERIENCE

Software Engineering Partnership - PT Jababeka Tbk

Mar 2026 - Aug 2026 | Jakarta, Indonesia

Co-managed the product lifecycle of JIFAS, an enterprise financial system, while delivering feature and UI improvements across accounting and finance workflows.

- Identified user pain points and delivered feature enhancements across accounting and finance modules.
- Spearheaded the front-end UI/UX migration to the Telerik framework for improved usability and responsiveness.
- Collaborated with business stakeholders to refine and integrate an internal AI chatbot into JIFAS workflows.

Tools: ASP.NET, Kendo UI Telerik, Finance Modules, SQL, AI Chatbot

AI Engineer Intern - PT Jababeka Tbk

Aug 2025 - Feb 2026 | Jakarta, Indonesia

Led requirements and technical delivery for internal AI and data automation tools supporting employee and financial workflows.

- Acted as technical product lead for an internal AI Agent chatbot supporting ticket creation and knowledge retrieval.
- Designed and implemented a Python duplicate-data detection tool for financial reporting workflows.
- Gathered requirements from employee support teams and aligned automation behavior with operational needs.

Tools: LangChain, FastAPI, Ollama, Python, Streamlit

SELECTED PROJECTS

Product Requirements & Full-stack Engineering - VANGUARD - Fleet Control Tower

Jul 2026

A 14-module realtime Fleet Control Tower with live mapping, geofencing, and automated alerts.

- Turned a logistics-dispatch workflow into an end-to-end monitoring product backed by realtime telemetry.
- Defined the requirements for a 14-module operational web application.
- Implemented live mapping, geofencing, and automated alerts.

Tools: Next.js, TypeScript, Tailwind CSS, MapLibre GL, FastAPI, SQLAlchemy, WebSocket, PostgreSQL, Docker

Product Lead & AI / Backend Developer - WhatsApp-Based Issue Reporting & Analytics Dashboard

Dec 2025 - Jun 2026

AI-powered WhatsApp issue reporting and an analytics dashboard integrated with TRAMOS Web.

- Aligned client business needs with technical constraints and made issue trends visible through a dedicated dashboard.
- Led product delivery from client requirements through technical integration.
- Built chatbot logic with a WhatsApp Gateway and Claude AI NLP.

Tools: Claude AI, FastAPI, React, NodeJS, MySQL, WhatsApp Gateway, TRAMOS Web

Full-stack AI Product Developer - AmanTeken - AI Legal Document Risk Analyzer

May 2026

AI legal document analysis that converts PDFs into risk scores and spoken summaries.

- Made document risk easier to inspect through a focused upload-to-analysis workflow.
- Designed an actionable legal-document risk scoring experience.
- Implemented multimodal analysis and text-to-speech summaries.

Tools: React, Vite, Django REST Framework, Python, Docker, Nginx, Google Cloud Run

Requirements & Dashboard Delivery - Kalbe Engineering System Dashboard

Jun - Jul 2025

Engineering dashboard for monitoring energy, work orders, maintenance metrics, and CAPA workflows.

- Consolidated energy, work-order, and equipment-performance data into a clearer decision surface for the client.
- Built dashboard views for energy consumption, work orders, MTTR, MTBF, and CAPA.
- Translated client needs into a professional monitoring interface.

Tools: NextJS, Typescript, Tailwind CSS, PostgreSQL, Real-time Data

EDUCATION

Information System - Data Science - President University

2023 - 2026 | Current GPA: 3.76

Developed strong skills in programming, data analysis, and application development through coursework and projects.

LEADERSHIP, ACHIEVEMENTS, AND CERTIFICATIONS

- 3rd Place - SETSsail Biz Accel Exhibition 2024, Service Category
- Jababeka Scholarship Awardee - covers 75% of tuition at President University
- Secured 10+ corporate partners for President University Fashion Week 2024
- Coordinated 20+ sponsors for Mr. & Ms. President University 2024
- Designed tournament systems and rules while coordinating technical and event logistics.
- Supported fundraising execution and sponsor-branding delivery.
- Coordinated event operations, logistics, and cross-team delivery.

AWS Training & Certification: Amazon QuickSight: Getting Started, Fundamentals of Machine Learning and Artificial Intelligence, Introduction to Generative AI: Art of the Possible, Introduction to Machine Learning: Art of the Possible, Executive's Guide to Generative AI Success, Fundamentals of Prompt Engineering with Claude, Building a Generative AI-Ready Organization, Designing Secure RAG Applications with AWS, Developing Generative AI Solutions, Generative AI for Executives, Optimizing Foundation Models, Planning a Generative AI Project

AI, Data & Developer Programs: GDG #JuaraVibeCoding 2026, GDG Vibe Coding Study Jam, Snowflake AI & Data Platform Training, Snowflake Discover AI, Future-Ready Industrial Parks: AI Trends & Agentic Workflows — 7-Network / JETData.AI
